Kevin Rajan

kevin@example.com | linkedin.com/in/kevinsrajan | github.com/kevinsrajan

Technical Skills

ML/AI Frameworks: PyTorch, TensorFlow, scikit-learn, Hugging Face Transformers, LangChain, OpenAI API
LLM Training: RLHF, DPO, RLAIF, Prompt Engineering, Fine-tuning, Red-teaming, Evaluation Design
Languages & Tools: Python, SQL, NumPy, pandas, Matplotlib, Jupyter, MLflow, Weights & Biases
Infrastructure: AWS (SageMaker, Lambda), Docker, Kubernetes, Git, FastAPI, REST APIs

Experience

LLM Training Specialist Jan. 2025 – Present
Outlier (Scale AI) *Remote*

- Designed comprehensive evaluation rubrics for LLM assessment, authoring 500+ complex prompts in logic, mathematics, and physics to identify reasoning failures and improve model performance by 15%
- Conducted red-teaming and adversarial testing across STEM domains, documenting 200+ edge cases contributing to safety alignment in production models (GPT-4, Claude)
- Performed large-scale preference labeling using RLHF, DPO, and RLAIF methodologies across 10K+ comparisons, achieving 94% inter-annotator agreement on quality rankings
- Developed multimodal evaluation frameworks integrating text, image, and tool-use tasks using Python, measuring grounding accuracy across 5 model architectures
- Built automated data validation scripts reducing annotation error rates by 30%

Founder & AI Engineer Jun. 2024 – Present
zero, LLC *Remote*

- Architected AI automation platform using Python and LangChain enabling LLMs to orchestrate workflows across 10+ applications, reducing manual intervention by 80%
- Built continuous research systems using pandas and scikit-learn to synthesize 50K+ health data points
- Prototyped digital twin simulations using PyTorch and reinforcement learning, achieving 95% accuracy in predicting system bottlenecks

Data-Driven Research (Sabbatical) Jul. 2023 – Jun. 2024
Self-Directed *Naperville, IL*

- Engineered performance optimization system using Python, SQL, and ML-based correlation analysis to track 50+ daily metrics and identify optimal training protocols
- Achieved top 1-5% ranking (25M+ users) through systematic A/B testing and iterative feedback optimization
- Applied statistical analysis to reverse-engineer complex systems, documenting findings in 20+ technical reports

Senior Consultant – Technology Enablement Jun. 2021 – Jul. 2023
Slalom Consulting *Chicago, IL*

- Led data strategy initiatives for Fortune 500 clients, building analytics pipelines and dashboards using Tableau and Python
- Spearheaded knowledge base creation using Confluence, establishing foundation for AI-driven content generation

Projects

RoutinePlus | *Swift, Core ML, Firebase* 2017

- Developed iOS app using Core ML to analyze calendar patterns and optimize routines with 90% user satisfaction

Nanotechnology Research | *Python, MATLAB, Statistical Analysis* 2016

- Analyzed absorption spectra using Python/MATLAB across 100+ experiments; published findings on nanoparticle optimization

Education

University of Illinois at Urbana-Champaign Urbana-Champaign, IL
B.S. Engineering Physics, Minor in Computer Science *May 2020*

- Coursework: Applied Machine Learning, Text Information Systems, Parallel Programming, Statistical Methods
