Kevin Rajan

kevin@example.com | linkedin.com/in/kevinsrajan | github.com/kevinsrajan

Technical Skills

Cloud Platforms: AWS (EC2, S3, Lambda, EKS, RDS, CloudWatch, IAM), Azure (AKS), GCP
Infrastructure as Code: Terraform, Ansible, Packer, CloudFormation, Helm, ArgoCD
Containerization: Docker, Kubernetes, Docker Swarm, containerd, EKS, AKS
CI/CD & Automation: Jenkins, GitLab CI, GitHub Actions, Bash, Python, Git
Monitoring & Observability: CloudWatch, Prometheus, Grafana, ELK Stack, Datadog

Experience

Founder & Infrastructure Engineer Jun. 2024 – Present
zero, LLC *Remote*

- Designed and deployed Infrastructure as Code environments using NixOS, Docker, and Kubernetes for on-premise GPU compute clusters, reducing operating costs by 50% ($15K/month savings)
- Architected automated deployment pipelines for AI workloads using GitOps principles and ArgoCD
- Implemented monitoring and alerting using Prometheus and Grafana, achieving 99.9% system uptime
- Built reproducible development environments using Nix, enabling consistent deployments across dev/staging/prod

Senior Consultant – Technology Enablement Jun. 2021 – Jul. 2023
Slalom Consulting *Chicago, IL*

- Led DevOps modernization for Fortune 500 finance client ($4B+ revenue), deploying CI/CD pipelines using Jenkins, Terraform, and AWS across 12 teams, reducing deployment time by 70%
- Architected IaC solutions using Terraform and Ansible to provision 200+ AWS resources (EC2, S3, Lambda, RDS) with 99.9% uptime SLA
- Designed automated AMI pipeline using Packer and Jenkins publishing biweekly golden Windows/RHEL images with CIS security compliance for 500+ developer workstations
- Orchestrated multi-cloud Kubernetes environments (AWS EKS, Azure AKS), containerizing 15+ microservices using Docker and Helm charts
- Championed DevOps training program for 500+ new hires, achieving 95% satisfaction and reducing onboarding time by 40%

Software Development Engineer Intern (EC2 Fargate) Summer 2018
Amazon Web Services *Seattle, WA*

- Developed internal monitoring dashboard using Java and CloudWatch to visualize container pool metrics, reducing mean-time-to-detection (MTTD) by 40%
- Implemented auto-scaling system using Python and Lambda to dynamically adjust compute capacity, handling 10K+ container requests/hour during traffic spikes
- Contributed to EC2 Fargate service codebase, deploying features to production serving millions of containers daily

IT Enterprise Architect Intern Jun. 2018 – Aug. 2018
BlueCross BlueShield (HCSC) *Chicago, IL*

- Developed data architecture recommendations analyzing 10+ data sources, influencing $2M+ technology decisions
- Documented current-state architecture and proposed cloud migration roadmap across 5 departments

Leadership

Admin Committee Aug. 2016 – May 2017
Association of Computing Machinery (ACM) *Champaign, IL*

- Managed ACM infrastructure (Linux, Apache, MySQL) serving 2,000+ members; secured $10K+ in sponsorships

Education

University of Illinois at Urbana-Champaign Urbana-Champaign, IL
B.S. Engineering Physics, Minor in Computer Science *May 2020*

- Coursework: Operating Systems Design, Systems Programming, Computer Architecture, Parallel Programming
