Kevin Rajan

(331) 444-2203 | kevinsrajan@gmail.com | Chicago, IL | github.com/kvnloo | linkedin.com/in/kevinsrajan

Technical Skills

DevOps: AWS, Terraform, Jenkins, Azure, Kubernetes, NixOS
Languages: Python, C++, C, Java, Haskell
Platforms: Ubuntu, Arch, Windows, RHEL

Experience

Founder & CEO Jun. 2024 – Present
zero, LLC *Remote*

- Run a home k3s fleet and off-host build and verification jobs for agent work; built Dash's Bun bridge over Tailscale and a verified open-source loop with leased claims, isolated worktrees, and evidence receipts.
- Landed 41 commits on **NousResearch/hermes-agent** main (Aug.–Oct. 2026) across runtime correctness (cron, gateway watchdog, config signatures), context-compaction safety, kanban, desktop, and platform adapters; opened 194 PRs and 161 issues and commented on 1,272 threads upstream.

Senior Consultant, Technology Enablement Jun. 2021 – Jul. 2023
Slalom Consulting *Chicago, IL*

- Collaborated within a multi-disciplinary team to enhance client ($4B+ revenue finance firm) engagement while modernizing technology systems across 12 teams and verticals. Mitigated obstacles for business unit teams using enhanced software processes and workflows, promoting Agile/DevOps/CI/CD concepts by utilizing AWS, Jenkins, Terraform and Vault.
- Improved developer impact by creating tailored pipelines that publish biweekly golden Windows and RHEL releases, ultimately ensuring security standards within custom AMIs.
- Championed a comprehensive DevOps training program tailored for over 500 new hires, ensuring a smooth transition into the company's technology ecosystem. Designed an engaging onboarding session anchored around point poker, fostering collaboration and hands-on learning. Orchestrated multi-cloud environments to provide an interactive, holistic, real-world experience of the best practices we use with our clients.

AWS Developer (EC2 Fargate) Aug. 2018 – Jan. 2019
Amazon *Seattle, WA*

- Increase response time in identifying customer container issues by conceptualizing and integrating pool metrics that allow developers to understand the state of the world.
- Automate modifying customer's compute capacity through an automatic pool management system that algorithmically detects customer traffic spikes.

Education

University of Illinois at Urbana-Champaign Urbana-Champaign, IL
B.S. Engineering Physics, Minor in Computer Science *Graduated May 2020*
