Experience

Founder & CEO Jun. 2024 – Present

zero, LLC *Remote*

- Conduct technical research to automate software processes while networking with software clients, enabling strategic alignment during discovery to identify pain points and create AI workflows to be included in a statement of work. Prototype OS-level automation for end-to-end product management, enabling LLMs to use internal, application-level APIs, resulting in complex workflows spanning multiple platforms/applications.
- Build continuous research systems to synthesize population-level trends to formulate preventative health solutions.

Senior Consultant, Technology Enablement Jun. 2021 – Jul. 2023

Slalom Consulting *Chicago, IL*

- Steered the conceptualization of a preventative health platform acting as product owner. Orchestrated the amalgamation of diverse health data sources, from wearables to full metabolic/blood panels. Initiated outreach to several health tech leaders and experts to gather insights, shaping preliminary ideas for platform features. Prioritized areas of focus by aligning the platform with cutting-edge health research and its potential for predictive analysis and enhanced patient outcomes.
- Spearheaded the creation of a centralized knowledge base, curating exemplary business documents like SPROs, customer stories, qualifiers, and evaluations across technological and business administrative platforms to enhance company-wide accessibility post-sanitization and lay the groundwork for AI-driven content generation.
- Championed a comprehensive DevOps training program tailored for over 500 new hires, ensuring a smooth transition into the company's technology ecosystem. Designed an engaging onboarding session anchored around point poker, fostering collaboration and hands-on learning. Orchestrated multi-cloud environments to provide an interactive, holistic, real-world experience of the best practices we use with our clients.

Sponsorship Staff Aug. 2015 – May 2016

HackIllinois *Champaign, IL*

- Raised over $300,000 by building long-lasting relationships with over 120 corporations.
- Streamlined relations between the staff and sponsoring corporations to guarantee an inviting corporate experience during the event while managing several other logistics of the hackathon.

Projects

Evolve (Claude Code Framework) Current

- Research and implement a spec-driven, dynamic framework that extends claude-code to methodically automate product development by integrating continuous deep research with skill development and curriculum discovery (inspired by papers like Voyager, Eureka, Alpha Evolve, SPARC).
- Mitigate hallucinations by guiding code generation with existing software frameworks (Agile, CI/CD), exhaustively researching state-of-the-art practices, extending capability by integrating with extensions (superclaude, claude flow, ccpm, MCPs), and parallelizing tasks by orchestrating multi-agent systems across separate workspaces (using git worktrees) for each feature.

Education

University of Illinois at Urbana-Champaign Urbana-Champaign, IL

B.S. Engineering Physics, Minor in Computer Science *Graduated May 2020*
